FACTS that will convince you:

IN TIROL, YOU ARE CLOSE TO EVERYTHING THAT MATTERS

01 Work and leisure perfectly combined
Here, you can switch in just a few minutes from work to leisure. After a video conference, head straight to the ski slopes or from the workshop to the nearest mountain lake. That's what real work-life balance looks like.

A community that connects
In Tirol, proximity is a way of life – and not just because of the location. People know, appreciate and support each other. Openness, pride, honesty and friendliness create a tangible sense of cohesion and trust – from colleagues and neighbours to guests and the community spirit in 8,500 clubs and associations.

03 Strength from nature
Whether it's snow-capped mountains in winter or flowering meadows in summer – the surroundings give you energy. Nature is good for the mind, body and soul.

Fun fact: There are as many chamois goats in Tirol as there are people in the German city of Rosenheim!

04 Gateway to the world
Innsbruck Airport offers direct connections to many different European cities. Its geographical location in the centre of Europe makes Tirol one of the best-connected railway destinations, so it is easy to travel to and from the region in an environmentally friendly way. Cities such as Munich, Milan and Zurich are just a few hours away.

ALPINE QUALITY OF LIFE ≠ DISCUSSION
